# XLERATOR®/XLERATOReco® HAND DRYER

## HYGIENE TECH SHEET

### THE MOST HYGIENIC DRYING SOLUTION

Excel Dryer is committed to providing the most hygienic hand drying solution to facilities around the world. While the cost savings and environmental benefits of high-speed, energy-efficient hand dryers are clear, there are many misconceptions about the hygienic efficacy of different hand drying methods.

### HEPA FILTRATION SYSTEM

Excel Dryer offers a HEPA Filtration System proven to remove 99.999% of viruses<sup>1</sup> and 99.97% of potentially present bacteria<sup>2</sup> at 0.3 microns from the airstream. The HEPA Filtration System is the only one with a washable pre-filter for reliable performance and extended filter life. The HEPA Filtration System is available as an optional feature in new XLERATOR/XLERATOReco units or can easily be retrofitted into existing units.

### ANTIMICROBIAL WALL GUARDS

Designed to fit securely below your Excel Hand Dryers, protecting your walls from water droplets that can be blown off wet hands by the powerful airstream. Stainless Steel and Microban® technology inhibits the growth of bacteria and it will not wash or wear away and lasts the lifetime of the product.

## BACTERIA COUNTS BEFORE WASH AND AFTER DRY (DRYING WITH PAPER TOWELS OR XLERATOR® HAND DRYER)

Microchem Laboratory is a contract microbiology lab offering a broad range of testing capabilities performed by a staff of specialized, experienced microbiologists. The graph shows the average number of bacteria (CFU = Colony Forming Units) present before washing and after drying.

*"There are no differences in the efficiencies of removing bacteria from washed hands when hands are dried using paper towels, cloth towels, warm forced air or spontaneous evaporation."*

– Mayo Clinic Proceedings, Vol. 87, Issue 8

*"Researchers at Laval University in Quebec City evaluated bacterial contaminants found on unused paper towels and found 17 species of bacteria on the paper towels with the most common being Bacillus, which causes food poisoning."*

– American Journal of Infection Control, Vol. 40
