

## THE D|13 SINK SYSTEM CREATES A FIVE STAR RESTROOM EXPERIENCE FOR BEAN RESTAURANT GROUP

The D|13 Sink System is creating an amazing restroom experience at two of the Bean Restaurant Group's most popular locations—and they're just getting started.

"The consumer loves it," says Andy Yee, Principal Managing Partner of the Bean Restaurant Group. "They come out saying, 'I really like your bathrooms.'"

*"THE CONSUMER LOVES IT. THEY COME OUT SAYING, 'I REALLY LIKE YOUR BATHROOMS.'"*

PRINCIPAL MANAGING PARTNER,  
BEAN RESTAURANT GROUP

## FORM AND FUNCTION

The D|13 Sink System is the most advanced integrated sink system on the market, providing the most hygienic, sustainable and cost-effective way to wash and dry hands. It offers a 95% cost savings versus paper towels, eliminating their labor, maintenance and waste while creating a more hygienic restroom environment.

In addition to state-of-the-art features including adjustable speed and heat, LED illumination and a Sound Suppression Air Delivery System, the D|13 Sink System comes fully equipped with a HEPA Filtration System proven to remove 99.999% of viruses<sup>1</sup> and 99.97% of potentially present bacteria at 0.3 microns<sup>2</sup> from the airstream.

"It's a good blend into our industry," Andy Yee says. "It's all touchless—soap, wash, dry. You eliminate the c-fold towels. There's no trash around the bathrooms anymore."

## REVERSE AIRFLOW. FORWARD THINKING.

In addition to the sleek design and intuitive user experience, what really sets the D|13 Sink System apart is the XLERATORsync® Hand Dryer. Designed in collaboration with Excel Dryer and a world-renowned design firm, the dryer's "reverse airflow" design blows air/water flow away from the user, promoting hygiene and enhancing the user experience.

"I thought the dryer might be blowing water onto my floors," Andy Yee says. "Then the yellow signs come up: Slippery When Wet. We've never had that problem with this system."

## A DESIGN-ASSIST PARTNER

The D|13 Sink System is fully customizable and adaptable to any size, shape or material. All orders are purchased and shipped directly from D|13 Group, giving you a one-one-one customer service experience.

"It was great working with the D|13 team," says Andy Yee. "They made it effortless for us, from the conceptual drawings to the finished product and installation. I can't wait to put the next one in."
